

# Are you suffering from mold sensitization?

☑ Has someone suggested that your ill health might be a result of biotoxin illness?

☑ Do you struggle to live a normal life because your home or workplace triggers symptoms?

**You are not alone!**  
**There are solutions.**

**You don't have to suffer in silence,  
wondering if you are crazy.**

**ALTHOUGH** the public interest in mold has cycled up and down over the past 15 years, science has made steady advancements on both the medical and environmental fronts in understanding the problems exposure can cause —especially for susceptible individuals. One of the key lessons to be learned from these advances is understanding that people who are impacted by biotoxin exposure often need an integrated team of specially trained individuals to assist them.

**AS SUCH**, there are plans for the introductory forum to be followed by a program in October featuring Dr. Ritchie Shoemaker, one of the world's foremost experts in diagnosing and treating illness caused by water-damaged buildings.

Come, share, and learn at two programs this September:

- ① Two-hour **PUBLIC FORUM** exploring the extent of these problems
  - ◇ September 19, 2013, in Central California
  - ◇ Free and open to the public
- ② Eight-hour **TRAINING COURSE** for consultants, contractors, and impacted individuals to learn the latest techniques for evaluating and improving environments for sensitized persons
  - ◇ September 20, 2013, in Central California
  - ◇ See course description and fee schedule on back

**FORUM** Join us on Thursday, September 19, 2013, from 6:00 to 8:00 p.m. to share your experience, learn about the issues of mold in a balanced way, and see how a core group of investigators, doctors, remediation experts, counselors, and rebuild contractors are coming together to address these types of problems.

The forum will be held at Atascadero Bible Church, 6225 Atascadero Mall, Atascadero, CA 93422

Even though there is no cost for the forum, please register on the website listed in sidebar.

## TRAINING COURSE

# Improving the Environment for Mold-Sensitized Individuals

Investigating, remediating, and rebuilding so that injured individuals can heal

### FORUM FACILITATOR

and

### COURSE INSTRUCTOR

Michael Pinto, CSP, CMP, is Chief Executive Officer of Wonder Makers Environmental. Mr. Pinto is the author of over 150 published articles and several books, one of which is *Fungal Contamination: A Comprehensive Guide for Remediation*. He holds numerous certifications in the environmental and safety areas, including Certified Safety Professional and Certified Mold Professional. He was selected as part of the Mitigation Assessment Team for FEMA following Hurricanes Katrina and Rita, and was lead editor for the FEMA publication *Cleaning Flooded Buildings* following Hurricane Sandy. He was also a contributor to the EPA's Healthy Homes Initiative. Among other volunteer positions, Michael serves on the Board of Directors for the Indoor Air Quality Association and the Environmental Council of the Restoration Industry Association. He can be reached at 269-382-4154 or [map@wondermakers.com](mailto:map@wondermakers.com)

## Course Description

There is much that can be done from an environmental perspective to assist mold-sensitized individuals. This program provides:

- A summary of the latest scientific, medical, legal, and remediation efforts to address mold- and water-damaged buildings
- The basics of environmental evaluation
  - ◇ Site investigation
  - ◇ Sampling
  - ◇ Interpretation
  - ◇ Elements of effective work plans
- Current techniques for remediation of source material
  - ◇ Update on new industry documents impacting the current standard of care
- Advancements in house/content cleaning
- Proper procedures for HVAC duct cleaning
- Materials and techniques for building or restoring homes and workplaces for sensitized people
- The importance of simple and effective cleaning and maintenance procedures

## Course Goals

- To let suffering individuals know that they are not alone
- To offer hope through science and case studies that sensitized individuals can be helped by proper medical and environmental treatments
- To show consultants and contractors that there is a real market for knowledgeable, trusted organizations that provide effective services
